

Packaging Films for Thermoforming

High Quality Forming Grades
designed to let your product shine.

PVC THERMOFORM Clear & White Gloss	Clear High-Impact Silicone & Anti-Block .0068 - .024	Clear Anti-Static Silicone .016 - .020	White High-Impact Anti-Block .010 - .015 - .020
	In Rolls - Custom Gauges, Colors & Sizes Available		

PET THERMOFORM Clear Gloss	RPET Recycled Post-Industrial Content Silicone 2 Sides .012 - .030	RPET Mill Run Post-Consumer or Industrial Silicone ▪ Anti-Block Anti-Static .008 - .070
	In Rolls - Custom Sizes Available / Mill Run Minimums Apply FDA & EU Compliant for Food Contact Use	

APET Mill Run 100% Virgin PET Silicone ▪ Anti-Block ESD ▪ Anti-Static .008 - .070	BIOPET Mill Run 20% BioMEG Silicone ▪ Anti-Block Anti-Static .008 - .070
In Rolls - Custom Sizes Available / Mill Run Minimums Apply FDA & EU Compliant for Food Contact Use	

GAG Sealable PETG-APET-PETG Silicone ▪ Anti-Block .015 ▪ .020 ▪ .030	GAG Mill Run Minimums Apply Anti-Block ▪ Anti-Static .008 - .063
In Rolls - Custom Sizes Available FDA & EU Compliant for Food Contact Use	

PET THERMOFORM Colors Gloss	Black & White RPET Post Industrial Content Silicone 1 Side .015 ▪ .020 ▪ .030	APET ▪ RPET Colors Mill Runs Minimums Apply Silicone ▪ Anti-Block .008 - .070
	In Rolls - Custom Sizes Available FDA & EU Compliant for Food Contact Use	

PP THERMOFORM Clear & Colors	PP Mill Run: Sheets & Rolls - Minimums Apply .005 - .039	
	<ul style="list-style-type: none"> ▪ Mono-Layer ▪ Multi-Layered PP/EVOH/PE 	Various Opacities & Textures FDA & EU Compliant for Food Contact Use

HDPE THERMOFORM	Black, White & Natural Sheets .023 ▪ .035 FDA & EU Compliant for Food Contact Use	Mill Run Colors Minimums Apply .008 - Over

At PVC Tech, we believe in Quality in Products, Solutions and Service. Our Thermoform films are no exception. Offered in a range of polymers, our vacuum form films are consistently performing, high-clarity and exceptionally strong whether in PVC, PET or PP.

Our clear PVC films are made using a special calendaring process that delivers an unparalleled crystalline finish, easily distinguished from other comparable films in the market and designed to give your product sparkling shelf appeal.

Looking for a sustainable solution? We offer PET films with post-consumer recycled content and BIOPET, made with bio-based content using renewable plant sources like sugar cane. Higher PCR content is available upon request.

Our HDPE films are also made with a maximum of 35% internally recycled content, have improved impact capabilities even in low temperatures and excellent hinge properties for packaging applications.

All our PET, PP & HDPE films are ideal for food packaging, complying with both US FDA & EU food contact regulations and easily recycled post-consumer use. If you have a specific application that requires additional features, we can custom design the perfect film for your requirements.

Applications:

- | | |
|------------------------|-------------------|
| Blister Packs | Point of Purchase |
| Clamshells | Rigid Packaging |
| Electronics Packaging | Toy Packaging |
| Food Contact Packaging | Vacuum Form Tray |

Ask your representative for more details on the thermoform materials we offer and get your samples today.
