Furniture Films

PVC Films for Use in Furniture and Laminate Applications

Our vinyl furniture films present a cost-effective and aesthetically pleasing solution to creating laminate and furniture finishes. Made of 100% Virgin Vinyl, our films are constructed with a unique surface texture and offered in a selection of popular colors and looks, from matte to a shiny gloss - perfect for a variety of designs.

Easy and convenient to use, our films are water resistant, have excellent performance properties and are made to be completely pinhole-free. To ensure seamless continuity, we quality control our films for consistency in thickness and color, eliminating variances that can be detrimental to furniture producers.

Since we know our films are destined for high visual exposure, each roll uses a heavy-duty inner core to prevent roll bending and is later wrapped in an outer foam layer before being individually boxed for shipment.

All the elements in our intelligent packaging are designed to minimize damage during transit, giving our customers the maximum yield out of every roll.

Have a specific look in mind? We can custom design films to your special requirements, adjusting color, gauge, feel and size as desired.

Our stock colors are readily available for shipment with custom design lead times advised as requested.

Contact your PVC Tech Representative for additional details and pricing. **1-888-782-8323**
